Product Description

According to usability studies, the number one characteristic of a successful web site is intuitive navigation. The number one solution to address this concern is a site search and site map application.

Think it's too difficult or too expensive to implement search on your site? Don't have access to the hardware your site is hosted on to install a search application? **NO PROBLEM.**

LOGIKA Corporation, a leading provider of custom, next generation Internet search solutions, presents FusionBot, the Web's most innovative, feature rich hosted application for instantly building site search and vertical search solutions.

Harness the **POWER of FUSION** on your site with nothing to purchase, install, configure, or maintain. FusionBot enables anyone to easily search-enable their site in minutes. With the FusionBot Mini-Search Portal feature, provide a collection of relevant sites to create a topic specific vertical search engine.

Utilizing our Customization Wizard, effortlessly design a dazzling and seamlessly integrated search results page for a transparent 'fusion' between your site and the FusionBot generated search results. Power users can take advantage of our custom template process, or pre-process their search results using XML, for complete customization control.
Customer Relationship Management (CRM)

FusionBot serves as an invaluable CRM tool. The FusionBot search box collects valuable insight into what your visitors are searching for, what they can and cannot find, and how often they rely on the search box provided. This information is made available via real-time graphical reports generated in the MyFusionBot Member Center. Careful analysis of the custom reports will help to design your site's content for maximum effectiveness and customer retention.

FusionBot can be implemented for **FREE**, or select from our **Bronze**, **Silver**, **Gold**, or **Platinum** Packages for more robust search solutions, starting at only $20.00 per month.

For customers whose needs go beyond a single site or collection of known sites, our Platinum Package is the perfect solution. By applying a mix of automated and human based content categorization techniques, we can cost effectively build a comprehensive vertical search solution for highly relevant, targeted search results around a particular segment of the Internet.

Participate in our attractive reseller program and earn extra revenue by implementing FusionBot on your customer's sites. Discounts start at 15% per month and increase based on the number of subscriptions credited to your account..

Sign up today at http://www.fusionbot.com, and put the **POWER of FUSION** to work on your site in minutes.

Harness the power of seamless site search & vertical search solutions
